Cyberint

Impactful Intelligence

CYBERINT ARGOS PLATFORM

DEEP & DARK WEB MONITORING DATASHEET

The Cyberint Argos platform continuously collects intelligence from thousands of sources across the deep and dark web. Argos automates the process of gaining access to closed threat actors chat groups and forums, providing extensive real-time visibility on relevant threats hiding in the darkest corners of the web.

Challenge

The deep and dark web is crawling with cyber threats but it can be challenging to get visibility into the hidden communities, chat groups, and marketplaces where threat actors coordinate and execute attacks. To further evade detection, threat actors are constantly on the move, jumping from forum to forum, in order to keep their cyber crime activities and their identities secret. A lack of visibility into these threat actor communities raises the level of cyber risk an organization faces.

Solution

The Cyberint Argos platform continuously monitors and gathers intelligence from the open, deep and dark web to extend your visibility on external risks. Advanced technology automates the process of developing new sources as bad actors migrate to new forums. With coverage for compromised credentials, data leakages, malware infections, phishing attacks, brand mentions, and more, Cyberint is a single solution that helps mitigate the risks lurking on the deep and dark web.

Key Benefits:

- Gain full visibility into relevant threats on the deep and dark web

- Detect compromised credentials and leaks of sensitive data

- Uncover malware infections of corporate and customer devices

- Know when your brands, products, or assets are being targeted in threat actor forums

- Receive impactful intelligence and targeted, contextualized alerts

- Adopt a proactive approach to security to eliminate threats before they develop into damaging and costly incidents
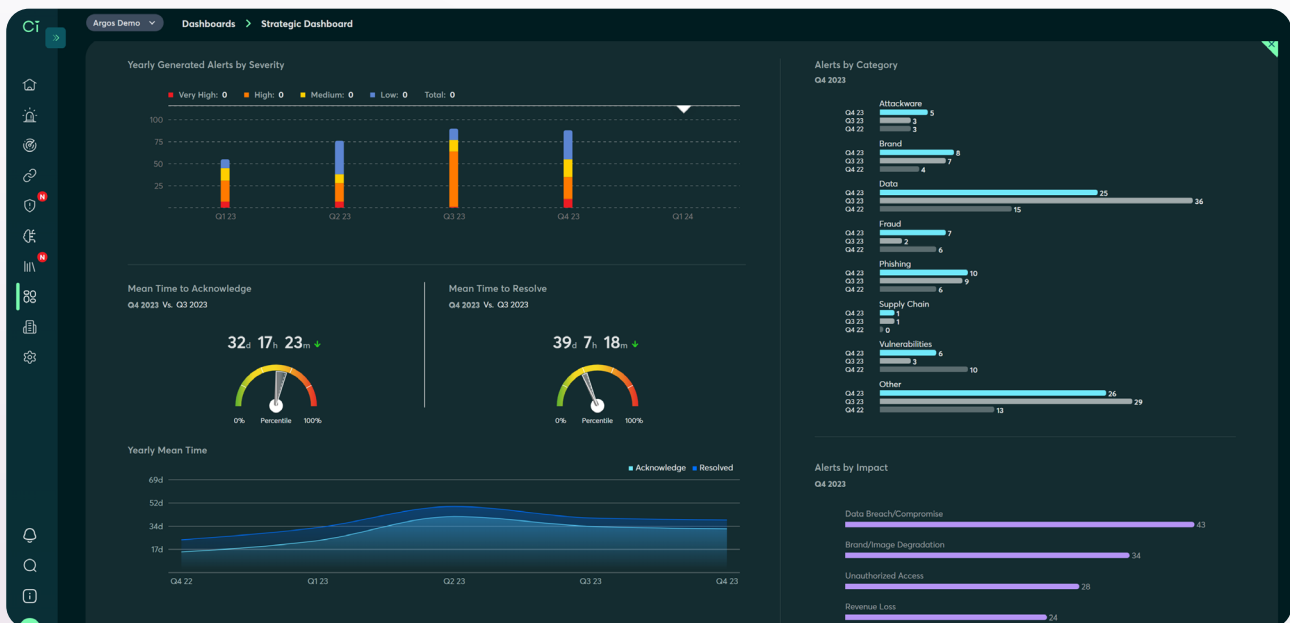

Continuous & Complete Visibility Across The Deep & Dark Web

Cyberint collects over 55 Million intelligence items every month, which are continuously added to the threat intelligence data lake, providing complete and real-time visibility across the web.

Data Dump Sites

Cyberint continuously collects intel from relevant paste bins and data dump sites across the open, deep and dark web.

Threat Actor Communities

Cyberint monitors chatter and discussions on Discord, Telegram, and other closed threat actor groups.

Dark Web & Onion Services

Cyberint gathers intel from hidden forums, marketplaces, ransomware gang onions, and other hidden Tor sites.

Identify Malware Infections & Leakages Of Sensitive Data

Cyberint collects over 25 Million leaked credentials each month, as well as an average of more than 500K stolen credit cards and over 1.9 Million malware logs, helping you identify relevant risks.

Uncover Compromised Credentials

Uncover leaked credentials for employees, customers, and people associated with trusted 3rd parties.

Detect Leaked Source Code, IP, and PII

Receive rapid notifications any time that your source code, intellectual property, or PII is dumped on the dark web.

Get Visibility On Malware Infections

Detect malware infections of corporate devices with extensive collection and analysis of malware logs.

Detect & Disrupt Threats In The Earliest Stages Of The Attack

The longer a threat goes undetected, the more likely it is to cause financial damages to the victim organization. Cyberint provides visibility on the deep and dark web so you can eliminate threats faster.

Investigate Threats & Groups

Understand your threat landscape, monitor relevant threat groups, and conduct deep investigations of IoCs.

Understand The Latest Trends In TTPs

Proactively protect your organization with real-time intelligence that reveals how bad actors are operating.

Monitor Deep & Dark Web Chatter

Be alerted to mentions of your brand names, domains, IP addresses, or other assets on the deep and dark web.

Cyberint

"Because we're a small team, the Cyberint analysts are like an extension of us, which really helps from a risk management standpoint."

Evans Duvall, Cyber Security Engineer, Terex

About Cyberint

Cyberint, the Impactful Intelligence company, reduces risk by helping organizations detect and mitigate external cyber threats before they have an adverse impact. The Cyberint Argos platform's patented technology provides superior visibility through continuous discovery of the evolving attack surface, combined with the automated collection and analysis of vast quantities of intelligence from across the open, deep and dark web. A team of global military-grade cybersecurity experts work alongside customers to rapidly detect, investigate, and disrupt relevant threats – before they have the chance to develop into major incidents. Global customers, including Fortune 500 leaders across all major market verticals, rely on Cyberint to protect themselves from an array of external risks, including vulnerabilities, misconfigurations, phishing, impersonation attacks, malware infections, exposed credentials, data leaks, fraud, and 3rd party risks.
